

# Boston BioProducts Popular Products

Boston BioProducts understands how important reliable results are in your research. Whether you require biological buffers, cell culture media, or balanced salt solutions, our extensive range of offerings are designed to support your scientific endeavors and provide trustworthy outcomes. Applications supported:

Molecular Biology

Cell Culture

Assay Development

Protein Research

Immunology

| Product                                                           | SKU#     | Size* | Price   |
|-------------------------------------------------------------------|----------|-------|---------|
| Phosphate Buffered Saline (10X, pH 7.4)                           | BM-220   | 500ml | \$21.00 |
| Phosphate Buffered Saline-Tween (10X, with 0.5% Tween-20, pH 7.4) | IBB-171  | 1L    | \$49.00 |
| Cell Culture Water                                                | WT-045   | 500ml | \$37.00 |
| Dulbecco's Phosphate Buffered Saline                              | BSS-100  | 500ml | \$20.00 |
| Phosphate Buffered Saline (pH 7.4, Sterile-Filtered)              | BM-220S  | 500ml | \$25.00 |
| Tris-Glycine-SDS Running Buffer (10X)                             | BP-150   | 1L    | \$27.00 |
| Tris Buffered Saline-Tween (20X, with 1% Tween-20, pH 7.4)        | IBB-181X | 1L    | \$73.00 |
| Tris Buffered Saline (10X, for Western Blot Washing)              | BM-301   | 1L    | \$25.00 |
| Molecular Biology Grade Water                                     | WT-020   | 500ml | \$37.00 |
| Transfer Buffer (10X, Electro Blotting)                           | BP-190   | 1L    | \$25.00 |

*\*Additional Sizes Available (starting from small aliquots to bulk quantities)*

## Custom doesn't have to mean Complicated.

Did you know that we offer custom buffer manufacturing? Our team has the knowledge and capabilities in custom buffer manufacturing to develop virtually any buffer for any application. With our optimized delivery process, you'll receive your custom buffers and cell culture media in days to weeks, not months. What you can customize:

- Formulation & Specs
- Raw Material Selection
- Filling & Processing
- Quality & Performance Tests
- Volume & Containers
- On-demand Quality Documentation
